

Fallen Angels Bebo Application Bebo Application (PHP)

Fallen Angels is a bebo application which allows users to remember loved ones who have passed away. It works in a way where users can get a Bebo Share URL from the main website <http://www.fallenangelsite.co.uk> and can then put it into the bebo application and show the memorial on their profile. This way it breaks up the normal boundaries of remembrance, such as location.

To view the application go to <http://apps.bebo.com/fallenangels/>
